PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building end-to-end web applications across government, marketplace, healthcare, education, and corporate sectors. Strong backend expertise in PHP, Laravel, MySQL, and Redis, combined with frontend proficiency in JavaScript, Vue, React, and Tailwind CSS. Delivered complete products covering API design, CMS development, payment integrations, certification systems, and responsive UI implementation. Experienced in Linux/Docker deployments and VPS management, with additional proficiency in C# and ASP.NET Core. Passionate about building secure, maintainable, and scalable solutions that deliver real value.

CORE SKILLS

Frontend	HTML5, CSS3, JavaScript, Vue.js, React, Tailwind CSS, Bootstrap, jQuery, AJAX
Backend	PHP, Laravel, C#, ASP.NET Core, .NET 8, Entity Framework Core, MySQL, Redis, REST API, Ocelot (API Gateway), Microservices, MVC, OOP
DevOps	Docker, Docker Compose, Portainer, Linux, Nginx, CI/CD, VPS Management
Integrations	Stripe API, Telnix API, Google Maps & Routes API, iWallet / Check21
Tools	Git, GitHub, Postman, Composer, Swagger / OpenAPI, Visual Studio, NuGet, cPanel, WHM

PROFESSIONAL EXPERIENCE

Full Stack Developer Feb 2023 – May 2024 / May 2025 – Jul 2026
Webcoder LLC

- Delivered 22+ projects across both tenures spanning government, corporate, and educational sectors.
- Built Ultrafix Appliance, a full-featured FSM back-office platform integrating Stripe/iWallet payments, Telnix SMS, and Google Maps/Routes GPS tracking (development complete, pending deployment).
- Designed and implemented 60+ REST API endpoints for the Qardaşlar platform.
- Resolved critical API freezing issues on INNAB Education Platform, reducing response time by ~67% (600ms → 200ms) through query optimization.
- Refactored codebase architecture on the Qarabag FK project and fixed multilingual translation system errors on bonafide.az.
- Collaborated with cross-functional teams (frontend, design, PM) to deliver production-ready systems within deadlines.

Backend Developer & DevOps Engineer (Contract, alongside full-time role) May 2025 – Jun 2026
Hostimul LLC

- Provided ongoing backend support and infrastructure maintenance on a contract basis (part-time, remote) while employed full-time at Webcoder LLC.
- Developed and maintained Laravel-based web applications and integrated RESTful APIs for internal and external systems.
- Managed MySQL databases, deployed applications via Docker, and implemented scalable infrastructure practices.

Full Stack Developer 2024 – 2025
EduNews.az — Təhsil Xəbər Platforması

- Built a full-stack CMS for managing news, articles, events, and job listings — including frontend templates with category/tag filtering and SEO-friendly URLs.
- Designed and optimized REST APIs (search, filtering, pagination) and applied caching to improve performance.

Backend Developer & DevOps Engineer May 2024 – May 2025
SAYT.AZ LLC

- Deployed and maintained 8+ web projects across corporate, government, and media sectors.
- Building the backend for FiraApp, a multi-vendor marketplace platform (in development) — product/cart/order modules, role-based auth, and payment infrastructure.
- Identified and fixed severe performance issues on football.biz, improving page load speed and SEO rankings.
- Debugged payment system issues on SAYT.AZ, resolved SMTP failures, and fixed hosting/domain purchase flows.
- Administered VPS servers and managed hosting via cPanel/WHM (SSL, DNS, email configuration).

Backend Developer 2023 – 2024
Telebe.az Marketplace Platform

- Integrated the United Payment gateway for balance top-ups, card tokenization (recurring payments), checkout, and payment callback processing.

- Built a Laravel Sanctum authentication system with email OTP registration/password recovery, plus REST APIs for user and admin panels.
- Integrated the BinList API for automatic card/bank detection with a caching mechanism to reduce lookup latency.

Freelance Backend Developer

2023 – 2024

Mechanizatorçu Sertifikasiya Sistemi — Ministry of Agriculture of Azerbaijan

- Developed a certification management system for TIR drivers with automated & manual certificate generation from dynamic templates.
- Built exam management module with digital signature support and QR code verification with multi-format certificate export.

Junior Full Stack Developer

Feb 2022 – Feb 2023

ADAS Digital Arts School

- Developed educational and creative web projects with full-stack responsibilities (frontend + backend).
- Built responsive UIs using HTML, CSS, JavaScript, Vue.js, and React.
- Implemented backend logic with PHP and Laravel; integrated REST APIs and managed MySQL databases.

Full Stack Developer

Jan 2019 – Mar 2020

Elmi İnkişaf Jurnalı

- Independently designed and built a full-stack scientific journal website — responsive frontend (HTML, CSS, Bootstrap, JavaScript, jQuery) and backend (PHP OOP, MySQL).
- Built admin panel for managing journal issues, articles, and authors; designed full database schema.

KEY PROJECTS

Full portfolio: muraddev.com/en/portfolios

Project	Description	Technology
Ultrafix Appliance <i>(pending deployment)</i>	FSM back-office platform — order-to-payment workflow, technician GPS tracking, 1099 tax reporting	PHP 8.2, Laravel 12, MySQL, Redis, Stripe, iWallet/Check21, Telnyx, Google Maps API
<u>Qardaşlar</u>	E-commerce / service platform — 60+ REST API endpoints	Laravel, MySQL, REST API
<u>INNAB Education Platform</u>	Online learning platform — full-stack; API response time reduced ~67% (600ms → 200ms)	Laravel, Docker, MySQL
<u>Qarabag FK</u>	Official website of Qarabag Football Club — codebase refactored for scalability	Laravel, MySQL, REST API
<u>Mechanizatorçu Sertifikasiya Sistemi</u>	Ministry of Agriculture driver certification — automated cert generation, digital signatures, QR verification	Laravel, MySQL, QR Code, Digital Signature
<u>Sabail District Executive Authority</u>	Official government website of the Sabail District Executive Authority	PHP, Laravel, MySQL, Docker
<u>Kapaz PFK</u>	Official website of Kapaz Professional Football Club	Laravel, MySQL
<u>ATS Food</u>	Corporate website and management platform	Laravel, MySQL
<u>Docheal</u>	Hospital management system built on microservices architecture (personal project)	C#, ASP.NET Core, Docker
<u>StokFlow</u>	Hospital inventory & warehouse management system (personal project)	C#, ASP.NET Core, MySQL

EDUCATION

Master's Degree - Social Work | 2020 – 2022

Azerbaijan State Pedagogical University
GPA: 91/100

Bachelor's Degree - Publishing & Editing

Baku State University | 2016 – 2020
